1. Questionnaire

1.1. Consent Form

The following text was presented:

Dear participant,

This study aims to investigate the perceptions and experiences of women developers in remote retrospective meetings in software development teams. We thank you in advance for your availability and participation. By submitting the filled questionnaire, you will automatically agree to the following terms:

Consent Statement

I agree to participate in a non-invasive study conducted by researchers from UFRJ. This study aims to evaluate the experience of developers in retrospective meetings within software development teams.

Procedure

This study consists of filling out a form consisting of closed and open-ended questions regarding your experience in the work environment, as well as an interview to deepen the theme. I declare: "I understand that all responses are personal and should be based on my own experience. I also understand that once the study is completed, my responses will be analyzed and coded."

Confidentiality

All information collected in this study is confidential. I declare: "I understand that my name will not be identified to third parties. Similarly, I agree not to share my responses with third parties until the study is completed."

Benefits and freedom to withdraw

I declare: "I understand that all benefits I obtain from this study are limited to learning. I understand that I have the freedom to request additional information about the study at any time, as well as to request the cancellation of my participation in the study. I understand that I have no obligation to contribute any information that I consider sensitive. I also understand that my name will not be used during the analysis of the results or their presentation. Finally, I understand that I am participating in the empirical study voluntarily, contributing to the advancement of Education in Computer Science."

By clicking continue, you agree to participate in the study."

1.2. Participant Characterization

This section had the following questions and types of answers presented in Table 1.

1.3. Social Identity

This section had the following questions and types of answers presented in Table 2.

ID	Questions	Type of Response
Q1	Full Name	Open
Q2	How do you identify your skin color?	Closed (Yellow / White / Indigenous / Brown / Black / Prefer not to say)
Q3	In which seniority level does your current position fit?	Closed (Intern / Junior / Intermediate / Senior)
Q4	Years of experience in activities related to software development in general:	Open
Q5	Years of experience in activities related to software development in general in your current job:	Open
Q6	What is your perception of your own experience with activities related to software development in general?	Closed (Very low / Low / High / Very high)
Q7	Estimated number of projects in which you worked on general software development activities:	Open
Q8	Estimated number of projects in which you worked on general software development activities in your current team:	Open
Q9	Estimated number of projects in your current team involving the practice of retrospective meetings:	Open

Table 1. Questions

ID	Question	Type of Response
Q10	I understand that I am part of my software development team	Likert
Q11	I have a lot to contribute to my Software Development team	Likert
Q12	I am a cooperative participant in my software development team	Likert
Q13	Describe your interaction in projects with your software development team	Open
Q14	I am satisfied to be part of the software development team to which I belong	Likert
Q15	I understand that the team to which I belong does not collaborate enough for the project	Likert
Q16	Could you give examples of situations and/or reasons why you felt satisfied/dissatisfied belonging to your software development team?	Open
Q17	Overall, my software development team is considered good by other teams	Likert
Q18	Most people consider my team, on average, more effective than other project teams	Likert
Q19	Other project teams respect my software development team	Likert
Q20	Other teams perceive the synergy of my team with the other project teams	Likert
Q21	In general, how do you define the perception of people outside regarding your software development team?	Open
Q22	My software development team is an important reflection of who I am.	Likert
Q23	My software development team is important to my perception of the kind of person I am	Likert
Q24	In general, belonging to my software development team is an important part of my self-image.	Likert
Q25	Describe how you understand that you are influenced by your software development team	Open
